

SRI ARUNODAYAM
Home for Mentally Challenged Destitute

Anupam's Story

Anupam was just four when he arrived at Sri Arunodayam through the Child Welfare Committee. Our early assessments showed significant developmental delays and a seizure disorder, leaving him completely dependent on his caregiver for everyday tasks.

His journey since then has been slow, steady, and full of quiet determination — and today, that determination has borne fruit. Anupam is not only making remarkable progress in his tailoring class, stitching shopping bags, coin purses, and utility pouches with growing skill and confidence, but he has also become a sports star, winning gold in the long jump at this year's District Level Sports Meet!

From a little boy struggling with the simplest skills to a young achiever excelling in sport and vocational training, Anupam's story reminds us that with the right support and patient guidance, every child can learn, grow, and thrive — no matter their disability.
